

OPENCOLLAB

enabling smart learning

LEARNING MANAGEMENT SYSTEM

WHO we are

OPENCOLLAB is a privately held South African company.

Head office in Cape Town, South Africa.

Worked with local and global, 57+ public and private educational brands

Assisted clients to take more than 1.7 million students through their learning journeys.

Using the world's leading open source eLearning solutions: including *Moodle.

Our staff specializes in student engagement solutions.

*Moodle is a trademark of Moodle.

Our collaborative approach sees us partner with our clients, ensuring that every solution and service we offer are masterfully crafted with our clients in mind, because your success merits our best.

How do we achieve the latter?

We align simplicity with student engagement in the field of e-learning and administrative systems. We guide clients to seamlessly adopt and integrate technology solutions into their day-to-day work environment.

OUR focus

Through our products and platforms, **OPENCOLLAB** aims to:

Implement platforms to enable educational technology for learning institutions.

Provide solutions and engage partners that consider and value local context and global relevance.

Create a platform that effectively supports learners through their learning journey.

Create a more intuitive and frictionless learning experience for all students and academic administrator.

Create a unified platform that supports preferred institutional applications.

Since 1999, OPENCOLLAB has gained in-depth insight and knowledge in the post-secondary public and private educational sectors and different learning models. Thus, our product is a client-driven solution, focusing on learner engagement and experience quality in the digital age.

Also, we engaged with numerous complementary industry solutions providers to bring our clients a modern eLearning platform that supports all the modern tenets of online and blended teaching and learning.

OUR industries

At **OPENCOLLAB**, solutions, products and platforms endeavour to work towards excellent multi-channel and adaptive capabilities that supports our clients' unique environment and ecosystem of solutions.

Our experience and ever increasing portfolio of solutions, technology skills and modern approach to software development and delivery have benefitted clients worldwide achieve measurable results.

- ▶ Higher Education Sector: Public and Private
- ▶ Business Sector
- ▶ Non-Profit Sector
- ▶ Workplace Training and Development
- ▶ Government Sector
- ▶ Healthcare Sector
- ▶ Sport Sector

OUR lms

ajourney.LMS (learning management system) is Moodle™ at its core, and we have added a host of additional key features to deliver this entire eLearning journey.

It is a fully-fledged secure, cloud-hosted eLearning solution that provides a comprehensive eLearning platform that drives effective learner interaction for improved and increased throughputs.

Boasting with a quick turn-around time to launching your e-learning courses, whether your courses are self paced, blended or face-to-face, is achieved by staff utilising the full suite of authoring tools and easy-to-use interface.

Keeping your learners informed is at the core of this modern eLearning system. **ajourney.lms** focuses on informing learners of their upcoming tasks, grade performance and activity progress.

ajourney.LMS further includes:

- ▶ communication features,
- ▶ language packs,
- ▶ assessment tools,
- ▶ badges,
- ▶ web conferencing capability
- ▶ a mobile app aids learners to learn on the go, even offline, on various devices.

Our focus is to bring customers the complete feature set and support services needed to offer effective eLearning courses. We integrate with a selection of proctoring and plagiarism detection solutions to complete the academic offering.

Lastly, grade configuration, reporting and analytics ensure that you are able to track every learner's progress, generate reports and act on insights.

Accurate and relevant LMS configuration during implementation is part of our recipe for success. Our experience over decades of working with training and educational institutions ensures a flexible, yet accurate setup of your eLearning environment.

OPENCOLLAB offers end to end LMS services (implementation, integration, configurations, and management services).

ajourney.lms benefits

- ✓ Data-driven
- ✓ Ease of adoption
- ✓ Reporting
- ✓ Configurable and Scalable
- ✓ Fully-fledged and secure
