*enabling smart learning*

STUDENT INFORMATION SYSTEM

# WHO we are

OPENCOLLAB is a privately held South African company.

Head office in Cape Town, South Africa.

Worked with local and global, 57+ public and private educational brands

Assisted clients to take more than 1.7 million students through their learning journeys.

Our staff specializes in student engagement solutions.

Our collaborative approach sees us partner with our clients, ensuring that every solution and service we offer are masterfully crafted with our clients in mind, because your success merits our best.

### **How do we achieve the latter?**

We align simplicity with student engagement in the field of e-learning and administrative systems. We guide clients to seamlessly adopt and integrate technology solutions into their day-to-day work environment.

# OUR focus

Through our products and platforms, **OPENCOLLAB** aims to:

Implement platforms to enable educational technology for learning institutions.

Provide solutions and engage partners that consider and value local context and global relevance.

Create a platform that effectively supports learners through their learning journey.

Create a more intuitive and frictionless learning experience for all students and academic administrator.

Create a unified platform that supports preferred institutional applications.

Since 1999, OPENCOLLAB has gained in-depth insight and knowledge in the post-secondary public and private educational sectors and different learning models. Thus, our product is a client-driven solution, focusing on learner engagement and experience quality in the digital age.

Also, we engaged with numerous complementary industry solutions providers to bring our clients a modern eLearning platform that supports all the modern tenets of online and blended teaching and learning.

# OUR industries

At **OPENCOLLAB**, solutions, products and platforms endeavour to work towards excellent multi-channel and adaptive capabilities that supports our clients' unique environment and ecosystem of solutions.

Our experience and ever increasing portfolio of solutions, technology skills and modern approach to software development and delivery have benefitted clients worldwide achieve measurable results.

Industry we have supported with our product:

- ▶ Higher Education Sector: Public and Private
- ▶ Business Sector
- ▶ Non-Profit Sector
- ▶ Workplace Training and Development
- ▶ Government Sector
- ▶ Healthcare Sector
- ▶ Sport Sector

# OUR sis

The **ajourney.SIS** is a fully fledged secure, cloud hosted student lifecycle management solution. Its student enabling features (student portal) provide students with self-service tools at their fingertips.

Converting prospects and applicants into enrolled students is made easy by the extensive e-commerce and application management functionality. Enrolment workflows required in your institution are supported by key features such as application management, admissions, e-commerce tools, course catalogue, self-help enrolment, course selection and confirmation.

Providing a solution that is able to adapt as your business changes and grows, puts you in control of creating and maintaining your organisation's student lifecycle processes. You define and maintain your departments, programmes, curriculums, fees, personally defined application forms, application rules, communication - templates, communication channels, assessment rules and much more.

Robust features exist for the management of admissions, enrolment, student accounts, communication and results - these workflows are further supported by various automated processes which greatly supports administration and reduces manual actions.

Data-driven decision making and student support is enabled through dashboards and self-help reporting to access and provide relevant information at your fingertips. Our full suite of integrations, including seamless integration with multiple learning management systems, completes the student lifecycle solution.
