

OPENCOLLAB background

FOUNDED

In 1999, OPENCOLLAB™ has delivered software solutions and services to post secondary education for more than 25 years.

SOUTH AFRICAN

We are a privately held South African Company, with its headquarters in Cape Town.

LEARNING SUPPORT

We have assisted clients to support more than 1.8 million students through their learning journeys.

CRAFTSMAN

Our Staff Specialises in Student engagement solutions for the post-secondary education and training market.

*Moodle is a trademark of Moodle.

DID YOU KNOW?

We have more than two decades of knowledge and experience.

Since 1999, **OPENCOLLAB** has gained in-depth insight and knowledge in the post-secondary public and private educational sectors and different learning models. Our product is a client-driven solution; focusing on learner engagement and experience quality in the digital age.

We engaged with numerous complementary industry solutions providers to bring our clients an e-learning platform that supports all the modern tenets of online and blended teaching and learning.

Through our products and platforms, **OPENCOLLAB** aims to:

Implement platforms to enable educational technology for education and training organisations.

Provide solutions and engage partners that consider and value local context and global relevance.

Create a platform that effectively supports learners through their learning journey.

Create a more intuitive and frictionless learning experience for all students and academic administrators.

Create a unified platform that supports preferred institutional applications.

Our collaborative approach sees us partner with our clients, ensuring that every solution and service we offer are masterfully crafted with our clients in mind because your success merits our best.

How do we achieve the latter?

We align simplicity with student engagement in the e-learning field and administrative systems. We guide clients to seamlessly adopt and integrate technology solutions into their daily work environment.

ajourney.lms (learning management system) is Moodle™ at its core, and we have added a host of additional key features to deliver this entire e-learning journey.

It is a fully-fledged secure, cloud-hosted e-learning solution that provides a comprehensive e-learning platform that drives effective learner interaction for improved and increased throughputs.

Boasting with a quick turn-around time to launching your e-learning courses, whether your courses are self paced, blended, or face-to-face, is achieved by staff utilising the full suite of authoring tools and easy-to-use interface.

Keeping your learners informed is at the core of this modern e-learning system. ajourney.lms focuses on informing learners of their upcoming tasks, grade performance and activity progress.

Our focus is to bring customers the complete feature set and support services needed to offer effective e-learning courses. We integrate with a selection of proctoring and plagiarism detection solutions to complete the academic offering.

ajourney.lms further includes

- communication features,
- language packs,
- assessment tools,
- badges,
- web conferencing capability,
- a mobile app aids learners to learn on the go, even offline, on various devices.

Lastly, grade configuration, reporting and, analytics ensure that you can track every learner's progress, generate reports and act on insights.

Accurate and relevant lms configuration during implementation is part of our recipe for success. Our experience over decades of working with training and educational institutions ensures a flexible, yet accurate setup of your eLearning environment.

OPENCOLLAB offers end-to-end LMS services (implementation, integration, configurations, and management services).

ajourney.lms benefits

ajourney.Lms features

Cloud Based

- Cloud hosted solution
